

# Weekly Report

Junming Ke

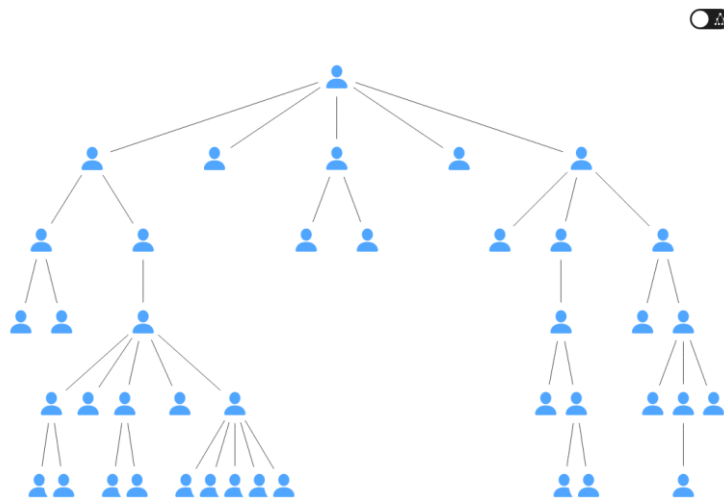

2016.7.18 - 2016.7.24

This week my main works are as follows:

1. Change the tree layout for NSVA, and for that, we deleted the layout function we used before.
2. Directed the Victor of them TianChi competition about how to reflect the impact between patients and AQI, PM2.5, PM10.

The details are as follows:

Tree layout:

I have used d3.js to construct this tree layout, and for that, I have delete all the code before to achieve this. There are still some bug in our system, and I will correct it next week.

I have heard that Dr. Yao will come to Hangzhou next week, I will confirmed the requirements next week.

As for TianChi competition, I think our group maybe achieve them system soon.

Next week:

1. Correct the NSVA system, and ask Dr. Yao for more details.
2. TianChi competition.
